PROJECTS

Online Test   Jan. 2024 - May 2024
Description - A react application to facilitate its users to attempt online test examinations, and observe & compare results. The objective of the application is to provide a platform for its users to practice test examinations. An intuitive UI consisting of a list of questions, easy navigation between questions, time-boxed test submission, and a detailed summary page to display the list of attempted/unattempted and correct/incorrect questions.
Tech Stack - React JS, Javascript, HTML, CSS, Bootstrap
Role - End to end development and testing

'Shayari' Portal   Aug. 2023 - Dec. 2023
Description - The 'Shayari' Web Project is an initiative focused on creating an online platform dedicated to showcasing a diverse collection of poems from various poets, cultures, and genres. This project aims to provide a centralised hub where poetry enthusiasts can explore, discover, and engage with a rich assortment of poetic works, fostering a community around the art of poetry appreciation and expression..
Tech Stack - Javascript, HTML5, CSS, Bootstrap
Role - End to end development and testing

Official Website Revamp   Feb. 2023 - May 2023
Description - Revamped the official website of SS Infotech, in order to modernize and enhance the online presence of our organization by redesigning and restructuring our website. This initiative is driven by the need to reflect our evolving services, improve user experience, and align with current web standards and trends. The revamped website will serve as a central platform for engaging with clients, showcasing our expertise, and promoting our solutions and services effectively.
Tech Stack - Javascript, HTML5, CSS, Bootstrap
Role - End to end development and testing
